

LUCAS BASTOS

SOFTWARE ENGINEER

Early-career software engineer passionate about technology and innovation. Experience in academic projects working as Product Owner, Product Designer, Frontend, Backend, and Quality Assurance. Seeking opportunities to gain practical experience and grow with the company.

PROJECTS

BYTE DONTO

- Integrative project being developed in the bachelor's degree program. The software is a web platform that aims to improve communication and transparency between patients and the clinic through AI.

- SDGs: 3 (Good Health and Well-being) and 9 (Industry, Innovation, and Infrastructure).

ROTA VERDE

- Winning project of UniEvangélica's first hackathon. The software is a native mobile app designed to assist in selective collection routes with the support of the population.

- SDGs: 11 (Sustainable Cities and Communities) and 7 (Partnerships and Means of Implementation).

R.A.S.

- The entrepreneurial training project of the Agrostartup 2025 Challenge. The software is a native mobile app that aims to track and document livestock with an IoT device.

- SDGs: 2 (Zero Hunger and Sustainable Agriculture) and 12 (Responsible Consumption and Production).
